PROFILE SUMMARY

Detail-oriented Computer Engineering undergraduate (2026) with hands-on experience in application development, Full Stack, Machine learning projects. Strong in Java, SQL, and Web Technologies and analytical problem-solving with proven ability to work on real-world technical solutions. Adept at communication, logical reasoning, and documentation, seeking an Opportunities in Developer, Software, Analyst and Other Tech roles.

TECHNICAL SKILLS

Programming Languages	Java, SQL, HTML, CSS, Python (Fundamentals)
Database	MySQL, MySQL Workbench
Tools & Platforms	VS Code, Google Colab, Figma, Spring Boot, Postman
Version Control System	Git, GitHub
Soft Skills	Analytical Thinking, Problem Solving, Communication, Decision making

EDUCATION

Saveetha School of Engineering, Chennai, Tamil Nadu	2022 - 2026
Bachelors of Engineering in Computer Science Engineering, CGPA – 8.00	
Sri Chaitanya Junior College, Tirupati, Andhra Pradesh	2020 - 2022
Intermediate (Class XII), MPC, Percentage – 81.6%	

EXPERIENCE

AI/ML intern Plasmid PVT LTD GitHub	Sept 2024 - Nov 2024
• Built an AI-based Spam News Detection system using Python, Google colab with ~88% accuracy. • Performed data collection, cleaning, preprocessing, and feature engineering on 1,000+ records. • Applied statistical analysis and model evaluation metrics (accuracy, precision, recall, F1-score). • Collaborated in end-to-end ML lifecycle and data pipeline development, version control using GitHub.	

CERTIFICATIONS

- Oracle Certified Professional Java SE17 Developer 2026 (**Oracle**)
- Oracle Cloud Infrastructure 2024 Certified AI Foundations Associate (**Oracle**)
- Cisco Networking Fundamentals (**Cisco Networking Academy**)

PROJECTS

E-Commerce Sales Analytics Website

- Built a Full stack e-commerce website and Developed product listing, cart, order management, and admin modules.
- Implemented sales analytics dashboard for revenue, stock, and top-selling products.
- Designed responsive frontend pages and integrated backend APIs with MySQL.
- **Tools & Technologies:** Spring boot, REST API's, Post Man, MySQL

Enhancing Agricultural Yield through Deep Learning Pest Detection

- Evaluated multiple **Deep Learning** architectures and Models for pest detection, achieving **85.86% accuracy**.
- Validated results using statistical testing (**Independent T-test, p < 0.05**).
- Optimized preprocessing pipelines to reduce manual classification effort.
- **Tools & Technologies:** Python, Deep Learning, Google Colab, TensorFlow/keras, SPSS

LEADERSHIP & ACADEMIC RESPONSIBILITIES

- Collaborated on academic mini and capstone projects from planning to delivery.
- Contributed to project execution, documentation, and presentation preparation.
- Participated in classroom presentations and internal evaluations.
- Ensured timely delivery through effective coordination and teamwork.
